

Press Release 07/03/07

## **MATHWORKS To Again Offer “Back-To-School” MATH CAMP 2007**

MATHWORKS, a math tutoring company located in North Naples, announces its Summer 2007 “back-to-school” Math Camp for students entering grades 4 to 12.

The camp features half-day, morning sessions (limited to 10) designed to get your child ready for math during the upcoming school year.

Camp sessions will follow the same format as the successful program MATHWORKS offered in the summer of 2006 and will focus on ensuring that your child has the skills needed to begin math in the new school year. This includes reviewing, relearning, introducing and understanding key math skills. We’ll also incorporate mind-stretching math games and brief, whole group learning activities. Most of the focus, however, will be on individual needs. We intend to emphasize hands-on learning through the use of math manipulatives and real-life math experiences as we try to make math “fun” for your child.

During the week of July 30 – August 3, we will offer three classes (for students entering grades 3-5; students entering grades 6 to 8 – pre-algebra focus; and students planning to take Algebra II).

During the week of August 6 – August 10, we'll feature two classes (for students entering grades 3-5 and students planning to take Algebra I).

And, during the week of August 13 – August 17, will be offering our Geometry class.

Camp sessions will be taught by Barbara G. Levine (certified elementary science-math specialist and past 5th grade Collier County teacher); H. Michael Mogil (degreed scientist and previous 5th grade science-math teacher); and other specially selected teachers from the Collier County School System.

Each attendee at MATH CAMP 2007 will receive a special set of grade-level appropriate math resource and workbooks. These can be used at camp, but also at home, to reinforce skills and knowledge and/or serve as ready math references.

Students will need to bring with them a mini-MATH TOOL KIT that contains needed math supplies – several pencils, a Pink Pearl™ eraser, a ruler and a loose leaf book (1" ring size sufficient) that contains both lined and graph paper.

Cost for the week-long program is \$425 inclusive. Mathworks, however, is offering a \$50 discount for each additional sibling who attends during the same summer (even if during a different week or class).

A 50% non-refundable deposit is required to reserve space in MATH CAMP 2007. The remaining 50% is due and payable by the first day of camp.

Classes will be taught at our Math Tutoring Center on Immokalee Road two miles east of I-75 (across from Gulf Coast High School). Classes will run from 9:00am - 11:30am Monday to Friday. Based on enrollment, we may have to shift the Algebra and Geometry classes to a nearby location and offer these Tuesday – Friday only (9:00am – noon).

For further information and to register, please contact MATHWORKS at [mathworks@weatherworks.com](mailto:mathworks@weatherworks.com) or at 239-592-6636 or 239-591-2468. An application form is posted at our web site: <http://www.weatherworks.com/math/summer-math-camp.html>

MATHWORKS also provides individualized and group math tutoring for students in grades 3 through college year-round and will be offering three high school math courses for homeschool students during the upcoming school year.

For more information about MATHWORKS programs (including schedule and cost) please visit our MATHWORKS web site at <http://www.weatherworks.com/mathworks.html>.
