SAT / ACT Prep @ Mathworks

Mathworks is pleased to announce that it is refocusing its SAT/ACT/FCAT tutoring program based on results from the past several years. Rather than offering classes in which student's needs may not be fully addressed, we are now devoting all of our efforts into one-on-one tutoring. In this way, our trained tutors can target specific weaknesses and work to overcome them without spending time on topics some of the participants in a class may already know.

This also gives students greater flexibility in getting tutored since they do not have time and/or day of week constraints.

Tutoring will continue to be provided in either math and/or language arts depending upon the student's needs.

As always, our highly focused and effective, math-based SAT/ACT preparation keys on **understanding math concepts** (algebra, geometry and for ACT - trigonometry), **decoding word problems** and **improving students' test-taking strategies**. Language arts tutoring will key on **vocabulary building, reading comprehension, reasoning, writing, and grammar skills and, also, improved test-taking strategies**. ACT tutoring will also address the science reasoning portion of the test.

It is important to begin SAT/ACT preparation as early as possible in the junior year. This is because it takes time to master vocabulary words and math concepts. But, with a driven student, we can often provide the needed support in as few as 8 sessions (either math or language arts).

Once you decide to become one of clients, we recommend that your student pick up their vocabulary and SAT/ACT prep books from the Math Tutoring Center prior to their first tutoring session and receive their initial assignment. This will allow them to begin initial activities and bring some completed work to their first tutoring session.

To sign up for this important tutoring, simply contact us at 239-591-2468 (Mathworks Center) or 239-352-2468 (office). You can also contact us via e-mail

at <http://www.weatherworks.com/contact.html>. We would be happy to answer any questions you may have and also provide guidance on the different tests, Bright Futures Scholarships and other aspects of the college experience.

Tutoring will be held at the Mathworks Learning Center (across from Gulf Coast High School on the north side of Immokalee Road). A map showing our Center location can be found at <http://www.weatherworks.com/mathworks.html>.

Note that Mathworks also offers individual tutoring for math and language arts grades 1 through college. We also provide tutoring in certain other subjects (such as physics, economics, geography and Spanish), on demand. Please visit our web site at <http://www.weatherworks.com/mathworks.html> for further information.
